

## Mrs. Math Algebra 1 Placement Test Instructions

**DISCLAIMER:** Grade-level expectations vary by program and state. This placement test is designed to assess your child's readiness for the Mrs. Math curriculum. Mrs. Math **strongly recommends** that all students complete a **Pre-Algebra course** before beginning Algebra 1.

If your child has already taken Pre-Algebra, this test can help determine whether a review through Mrs. Math's Pre-Algebra course would strengthen their foundation—or if they're ready to move forward with Algebra 1.

---

### General Instructions

- Your child should complete the student assessment **independently** and **without a calculator**. Light supervision is encouraged to ensure no outside help is given.
  - **Note:** It's okay to **read questions aloud**, but **do not assist** in solving them. Encourage your child to use scratch paper and to try their best to answer each question. However, if they're completely unfamiliar with a topic, it's better to leave the question blank rather than guess.
- 

### Assessment Overview

30-Question Assessment

### Scoring Guide:

- **0–19 points:** *We recommend your child takes Mrs. Math's Pre-Algebra course prior to taking Algebra 1.*
- **20–23 points:** *Your child is in a transition range. They may be ready for Algebra 1, but some review or support could be beneficial. Please consider their confidence, age, and prior math experience. (For students entering 7th or 8th grade, Pre-Algebra may be the better fit to reinforce foundational skills. For students in 9th grade or above, Algebra 1 is likely a suitable starting point for their high school math experience.)*
- **24-30 points:** *Your child is likely ready for Algebra 1.*
